

src/LMX/lmx_base_selector.h

```
graph TD; A[src/LMX/lmx_base_selector.h] --> B[iostream]; A --> C[sstream];
```

The diagram illustrates a header file inheritance structure. At the top, a gray box contains the text 'src/LMX/lmx_base_selector.h'. Two blue arrows point downwards from the bottom center of this box to two separate white boxes below. The left white box contains the text 'iostream' and the right white box contains the text 'sstream'. This indicates that both 'iostream' and 'sstream' inherit from or are derived from 'src/LMX/lmx_base_selector.h'.
